Smoke Gets in Your Eyes Jul 19 2021 "For more than a hundred years, the cigarette industry has hired some of the world's cleverest designers to make smoking appeal to as many different types of men and women in as many different cultures as possible." "The introduction traces the interwoven history of cigarettes and their packaging, from the earliest hand-rolled smokes preferred by soldiers, sailors, and bohemians to the latest trendy pack adopted by the young and terminally hip. History in the larger sense intersects in unexpected ways, with brands positioned to help win wars, glorify local dictators, and immortalize the masses. Thematic chapters ranging from Orientalism to Snob Appeal to Cigarette Indians survey the different categories of designs favored over the years as well as chronicling not only such famous campaigns as the Marlboro Man and Joe Camel but also such lesser-known oddities as Fems, Fez, and Wooden-Kimona Nails."--BOOK JACKET.Title Summary field provided by Blackwell North America, Inc. The Cigarette Jan 31 2020 The story of tobacco's fortunes seems simple: science triumphed over addiction and profit. Yet the reality is more complicated—and more political. Historically it was not just bad habits but also the state that lifted the tobacco industry. What brought about change was not medical advice but organized pressure: a movement for nonsmoker's rights.

Tobacco Goes to College Dec 24 2021 This is the first book to document the history of cigarette advertising on college and university campuses. From the 1920s to the 1960s, such advertisers had a strong financial grip on student media and thus a degree of financial power over colleges and universities across the nation. The tobacco industry's strength was so great many doubted whether student newspapers and other campus media could survive without them. When the Tobacco Institute, the organization that governed the industry, decided to pull their advertising in June of 1963 nearly 2,000 student publications needed to recover up to 50 percent of their newly lost revenue. Although student newspapers are the main focus of this book, tobacco's presence on campus permeated more than just the student paper. Cigarette brands were promoted at football games, on campus radio and through campus representatives, and promotional items were placed on campus in locations such as university stores and the student union.

The Cigarette Book Oct 22 2021 From A is for Aardvark—"We're not allowed to tell you anything about Winston cigarettes, so here's a stuffed aardvark"—to Z is for Zippo, the iconic American lighter, *The Cigarette Book* is the ultimate souvenir and celebration of the dying art of smoking. Encyclopedic in both layout and range, this is an ideal consolation gift for those who have stopped, an ideal aide de memoire for those who might, and a defiant puff of libertarian brilliance for those who won't. Celebrate the Hollywood age of smoking when film stars lit up with glamorous abandon. Witty, illustrated, collectible, and up-to-date. "... All smokers know that cigarettes are dangerous. Each one is a dance with death—and the defiant smoker will say that therein lies its charm. So each puff is an existential gesture, an assertion of choice and life in the face of death." One day the last cigarette on earth will be smoked. One final puff will be sent heaven-bound, leaving a lingering, evanescent smoke ring. And the wise of this world will rejoice. Because logic demands that mankind is rid of this pernicious poison. And wasn't that well-known logician Adolf Hitler the most virulent opponent of cigarette smoking in the last century? Until then, read this book.

In Search Of Cigarette Holder Man Mar 27 2022 "His humor is wry, partisan, and caustically combative. The satirical eye behind the comic strip *Doonesbury*, Garry Trudeau is America's most mirthful, cutting chronicler of these times." --*Esquire* One of the cogitative and comical story lines in Trudeau's collection, *In Search of Cigarette Holder Man*, revolves around Duke's 1960s plot to doctor an evidence photo of the Kennedy assassination for cash. He thought he'd finished milking the hoax years earlier, but his able assistant and willing love slave, Honey Huan, uncovers a group of determined conspiracy theorists on the Internet who are hot on the trail anew. As narrator, Mark wraps up the series: "So which version took place on Earth? You be the judge. See you at the 35th!" Certainly no one can put a fun-poking--and funny--spin on issues better than Garry Trudeau. He features colleges passing out A's as a way to build self-esteem, cuff-link and helicopter ride payoffs after NAFTA's passage, cybersurfing political issues with a homeless couple, and over-zealous product plugs in the movies. Truly, no topic is spared from Trudeau's biting wit. Throughout this collection, *In Search of Cigarette Holder Man*, the artist's incisive views on events continue to provide entertainment in its highest--and sharpest--form. From the backwaters of Whitewater to brush fires of the rich and famous, Trudeau's eagle eye captures them all. Everyone will find something in this talented pundit's take on American life.

Pushing Cool Mar 15 2021 Spanning a century, *Pushing Cool* reveals how the twin deceptions of health and Black affinity for menthol were crafted—and how the industry's disturbingly powerful narrative has endured to this day. Police put Eric Garner in a fatal chokehold for selling cigarettes on a New York City street corner. George Floyd was killed by police outside a store in Minneapolis known as "the best place to buy menthols." Black smokers overwhelmingly prefer menthol brands such as Kool, Salem, and Newport. All of this is no coincidence. The disproportionate Black deaths and cries of "I can't breathe" that ring out in our era—because of police violence, COVID-19, or menthol smoking—are intimately connected to a post-1960s history of race and exploitation. In *Pushing Cool*, Keith Wailoo tells the intricate and poignant story of menthol cigarettes for the first time. He pulls back the curtain to reveal the hidden persuaders who shaped menthol buying habits and racial markets across America: the world of tobacco marketers, consultants, psychologists, and social scientists, as well as Black

lawmakers and civic groups including the NAACP. Today most Black smokers buy menthols, and calls to prohibit their circulation hinge on a history of the industry's targeted racial marketing. In 2009, when Congress banned flavored cigarettes as criminal enticements to encourage youth smoking, menthol cigarettes were also slated to be banned. Through a detailed study of internal tobacco industry documents, Wailoo exposes why they weren't and how they remain so popular with Black smokers.

The Cigarette Century Nov 10 2020 From agriculture to big business, from medicine to politics, The Cigarette Century is the definitive account of how smoking came to be so deeply implicated in our culture, science, policy, and law. No product has been so heavily promoted or has become so deeply entrenched in American consciousness. The Cigarette Century shows in striking detail how one ephemeral (and largely useless) product came to play such a dominant role in so many aspects of our lives—and deaths.

Ashes to Ashes Feb 11 2021 No book before this one has rendered the story of cigarettes -- mankind's most common self-destructive instrument and its most profitable consumer product -- with such sweep and enlivening detail. Here for the first time, in a story full of the complexities and contradictions of human nature, all the strands of the historical process -- financial, social, psychological, medical, political, and legal -- are woven together in a riveting narrative. The key characters are the top corporate executives, public health investigators, and antismoking activists who have clashed ever more stridently as Americans debate whether smoking should be closely regulated as a major health menace. We see tobacco spread rapidly from its aboriginal sources in the New World 500 years ago, as it becomes increasingly viewed by some as sinful and some as alluring, and by government as a windfall source of tax revenue. With the arrival of the cigarette in the late-nineteenth century, smoking changes from a luxury and occasional pastime to an everyday -- to some, indispensable -- habit, aided markedly by the exuberance of the tobacco huskers. This free-enterprise success saga grows shadowed, from the middle of this century, as science begins to understand the cigarette's toxicity. Ironically the more detailed and persuasive the findings by medical investigators, the more cigarette makers prosper by seeming to modify their product with filters and reduced dosages of tar and nicotine. We see the tobacco manufacturers come under intensifying assault as a rogue industry for knowingly and callously plying their hazardous wares while insisting that the health charges against them (a) remain unproven, and (b) are universally understood, so smokers indulge at their own risk. Among the eye-opening disclosures here: outrageous pseudo-scientific claims made for cigarettes throughout the '30s and '40s, and the story of how the tobacco industry and the National Cancer Institute spent millions to develop a "safer" cigarette that was never brought to market. Dealing with an emotional subject that has generated more heat than light, this book is a dispassionate tour de force that examines the nature of the companies' culpability, the complicity of society as a whole, and the shaky moral ground claimed by smokers who are now demanding recompense

Golden Holocaust Jan 13 2021 The cigarette is the deadliest artifact in the history of human civilization. It is also one of the most beguiling, thanks to more than a century of manipulation at the hands of tobacco industry chemists. In *Golden Holocaust*, Robert N. Proctor draws on reams of formerly-secret industry documents to explore how the cigarette came to be the most widely-used drug on the planet, with six trillion sticks sold per year. He paints a harrowing picture of tobacco manufacturers conspiring to block the recognition of tobacco-cancer hazards, even as they ensnare legions of scientists and politicians in a web of denial. Proctor tells heretofore untold stories of fraud and subterfuge, and he makes the strongest case to date for a simple yet ambitious remedy: a ban on the manufacture and sale of cigarettes.

Cigarette Wars Oct 10 2020 We live in an age when the cigarette industry is under almost constant attack. Few weeks pass without yet another report on the hazards of smoking, or news of another anti-cigarette lawsuit, or more restrictions on cigarette sales, advertising, or use. It's somewhat surprising, then, that very little attention has been given to the fact that America has traveled down this road before. Until now, that is. As Cassandra Tate reports in this fascinating work of historical scholarship, between 1890 and 1930, fifteen states enacted laws to ban the sale, manufacture, possession, and/or use of cigarettes--and no fewer than twenty-two other states considered such legislation. In presenting the history of America's first conflicts with Big Tobacco, Tate draws on a wide range of newspapers, magazines, trade publications, rare pamphlets, and many other manuscripts culled from archives across the country. Her thorough and meticulously researched volume is also attractively illustrated with numerous photographs, posters, and cartoons from this bygone era. Readers will find in *Cigarette Wars* an

engagingly written and well-told tale of the first anti-cigarette movement, dating from the Victorian Age to the Great Depression, when cigarettes were both legally restricted and socially stigmatized in America. Progressive reformers and religious fundamentalists came together to curb smoking, but their efforts collapsed during World War I, when millions of soldiers took up the habit and cigarettes began to be associated with freedom, modernity, and sophistication. Importantly, Tate also illustrates how supporters of the early anti-cigarette movement articulated virtually every issue that is still being debated about smoking today; theirs was not a failure of determination, she argues in these pages, but of timing. A compelling narrative about several clashing American traditions--old vs. young, rural vs. urban, and the late nineteenth vs. early twentieth centuries--this work will appeal to all who are interested in America's love-hate relationship with what Henry Ford once called "the little white slaver."

Cigarettes, Inc. Jun 05 2020 Traditional narratives of capitalist change often rely on the myth of the willful entrepreneur from the global North who transforms the economy and delivers modernity—for good or ill—to the rest of the world. With *Cigarettes, Inc.*, Nan Enstad upends this story, revealing the myriad cross-cultural encounters that produced corporate life before World War II. In this startling account of innovation and expansion, Enstad uncovers a corporate network rooted in Jim Crow segregation that stretched between the United States and China and beyond. *Cigarettes, Inc.* teems with a global cast—from Egyptian, American, and Chinese entrepreneurs to a multiracial set of farmers, merchants, factory workers, marketers, and even baseball players, jazz musicians, and sex workers. Through their stories, *Cigarettes, Inc.* accounts for the cigarette's spectacular rise in popularity and in the process offers nothing less than a sweeping reinterpretation of corporate power itself.

Smokeless Tobacco and Some Tobacco-specific N-nitrosamines Jun 25 2019 This eighty-ninth volume of the IARC Monographs is the third and last of a series on tobacco-related agents. Volume 83 reported on the carcinogenicity of tobacco smoke and involuntary smoking (second-hand smoke or environmental tobacco smoke) (IARC 2004a). Volume 85 summarized the evidence on the carcinogenic risk of chewing betel quid with and without tobacco (IARC 2004b). That volume explored the variety of products chewed in South Asia and other parts of the world that contain areca nut in combination with other ingredients, often including tobacco. In this eighty-ninth volume, the carcinogenic risks associated with the use of smokeless tobacco, including chewing tobacco and snuff, are considered in a first monograph. The second monograph reviews some tobacco-specific nitrosamines. These agents were evaluated earlier in Volume 37 of the Monographs (IARC 1985) and information gathered since that time has been summarized and evaluated.

How Tobacco Smoke Causes Disease Aug 08 2020 This report considers the biological and behavioral mechanisms that may underlie the pathogenicity of tobacco smoke. Many Surgeon General's reports have considered research findings on mechanisms in assessing the biological plausibility of associations observed in epidemiologic studies. Mechanisms of disease are important because they may provide plausibility, which is one of the guideline criteria for assessing evidence on causation. This report specifically reviews the evidence on the potential mechanisms by which smoking causes diseases and considers whether a mechanism is likely to be operative in the production of human disease by tobacco smoke. This evidence is relevant to understanding how smoking causes disease, to identifying those who may be particularly susceptible, and to assessing the potential risks of tobacco products.

An a to Z of Football Collectibles Sep 28 2019 An illustrated history of football trade cards, an epic saga of 1,000 brands and myriad collections. The A-Z traces the earliest cards and stickers--British inventions, both--through a century of sports cards from tobacco cards to Panini stickers, via everything that came in between: footballers issued with chewing gum and sweet cigarettes, lucky bag mementos, football teams cut from packets of tea, and many more. It chronicles the epoch of our forefathers and the very first football cards, dating back to the 1880s, followed by the era of their children and the earliest stickers--and so the rise of cigarette cards and paper soccer star adhesives. Fond recollections of childhood passions past and present will warm hearts, while enchanting galleries of rarely seen cards will captivate football fans and collectors alike. Incorporating a guide to values, the A-Z is priceless.
