garages in Chicago and Champaign-Urbana, Illinois, and Cambridge and Boston, Massachusetts, statistical analyses were carried out of the equivalent uniform distributed loads. These produce the maximum column axial loads and beam midspan moments that the building is expecting to experience during its lifetime. The dynamic amplifications resulting from vehicle motions on the decks and ramps were also investigated, and results suggest a possible reduction of the design live load from the current value of 50 psf, as stipulated in the ASCE-7 and Uniform Building Code, to 40 psf, but with no allowance for reduction according to bay area.

**Pregnant Occupant Biomechanics** Oct 01 2020 This ground-breaking book provides substantial new analysis and summary data about pregnant occupant biomechanics, and will serve as a critical asset to anyone in the field of automobile safety. The overall goal of this book is to provide the reader with a complete resource for issues relating to the pregnant occupant. This multi-authored book is thoroughly vetted and includes chapter contributions from highly qualified practitioners in the field. A total of 19 technical papers are featured and are broken into six chapters. Each chapter begins with a brief summary and analysis of the research for that topic, and is followed by a selection of references. The remainder of the chapter includes a selection of the very best full-length technical papers on the topic, which are intended to provide depth and compliment the new material.

Interoperability Cost Analysis of the U.S. Automotive Supply Chain Apr 07 2021 NIST's Manufacturing Engineering Laboratory (MEL) is developing standards that promote interoperability among members of the U.S. automotive supply chain. This study assesses the costs of imperfect interoperability to the U.S. automotive supply chain and describes the sources of these costs. This study estimates that imperfect interoperability imposes at least \$1 billion per year on the members of the U.S. automotive supply chain. By far, the greatest component of these costs is the resources devoted to repairing or reentering data files that are not usable for downstream applications.

last several years, significant efforts have been directed toward the development of ultra-clean, gasoline-powered vehicles in the automotive industry. With the coming of increasingly stringent emissions legislation, this development is more critical now than ever before. This has led to an increase in the technical information available. *Advanced Developments in Ultra-Clean Gasoline-Powered Vehicles* provides the reader with technical information including a description of fundamental processes, insight on technical issues, key trends, and future R&D directions.

**WHAT DO I DO WITH MY PAIN?** May 28 2020 **WHAT DO I DO WITH MY PAIN?** Preparing for church on October 10, 2010, I was reminded of the ways in which I was being used by God in accomplishing HIS will. I am truly grateful, appreciative and remorseful all at the same time. Remorseful because I can remember a time I not only ran from God and what HE had to offer me, but I doubted HIS existence. Grateful because in spite of me and my past, God still loved me [John 15:13] and wanted nothing but the best for me. Appreciative because God never stopped trying to reach me! In creating me for a purpose with a purpose, HE was persistent in HIS approach in making sure I receive my inheritance. Persistent to the point of revealing HIMSELF to me and allowing me to see myself through HIS eyes! My passion for God this day is nothing like I would have imagined. Great is my boldness of speech toward YOU, great is my glorying of YOU: I am filled with comfort, I am exceedingly joyful in all my tribulation. [2 Corinthians 7] Ordering my steps while rebuilding my confidence (trust, belief) and faith in HIM, God was training me to be fearless and teaching me to fight for the uplifting of the Kingdom. Finally, unselfishly yielding myself to HIM, HE gradually enlightened me to HIS plan for my life. Then I realized God was and is with me always as I

gladly accepted my assignment in knowing God was deliberately putting me in situations [sending me in places where there was darkness to be HIS light]. Once I was in, God gave me no way out as HE forced me to stand and fight. For ye have not received the spirit of bondage again to fear; but ye have received the Spirit of adoption, whereby we cry, Abba, Father. [Romans 8:15] So, this is not a time for passivity! It is a time for all of God's children to join in Spirit as we connect to God's heart in fulfilling HIS will.

Multicriterion Decision in Management Jul 30 2020 Multicriterion Decision in Management:

Principles and Practice is the first multicriterion analysis book devoted exclusively to discrete multicriterion decision making. Typically, multicriterion analysis is used in two distinct frameworks: Firstly, there is multiple criteria linear programming, which is an extension of the results of linear programming and its associated algorithms. Secondly, there is discrete multicriterion decision making, which is concerned with choices among a finite number of possible alternatives such as projects, investments, decisions, etc. This is the focus of this book. The book concentrates on the basic principles in the domain of discrete multicriterion analysis, and examines each of these principles in terms of their properties and their implications. In multicriterion decision analysis, any optimum in the strict sense of the term does not exist. Rather, multicriterion decision making utilizes tools, methods, and thinking to examine several solutions, each having their advantages and disadvantages, depending on one's point of view. Actually, various methods exist for reaching a good choice in a multicriterion setting and even a complete ranking of the alternatives. The book describes and compares these methods, so-called 'aggregation methods', with their advantages and their shortcomings. Clearly, organizations are becoming more complex, and it is becoming harder

and harder to disregard complexity of points of view, motivations, and objectives. The day of the single objective (profit, social environment, etc. ) is over and the wishes of all those involved in all their diversity must be taken into account. To do this, a basic knowledge of multicriterion decision analysis is necessary. The objective of this book is to supply that knowledge and enable it to be applied. The book is intended for use by practitioners (managers, consultants), researchers, and students in engineering and business.
