Army Facilities Management Oct 29 2022 AR 420-1 Published 1 June 2018 Army Facilities Engineering Regulation 420-1, Army Facilities Management (24 August 2012) describes the management of public works activities, housing, and other facilities operations and management, military construction program development and execution, master planning, utilities services and energy management, and fire and emergency services. Also, it identifies and synthesizes other regulations that provide detailed facilities management policy. This regulation applies to the Active Army, the Army National Guard/Army

National Guard of the United States, and the U.S. Army Reserve. This book is a terrific source for sound, cost-effective energy management and investment practices to enhance the DoD's energy security and environmental stewardship. Depending on the military installation location, well-planned energy and water use savings can represent thousands to hundreds-of thousands dollars each year, and many can be achieved with minimal cash outlays. Why buy a book you can download for free? We print this book so you don't have to. First you gotta find a good clean (legible) copy and make sure it's the latest version (not always easy). Some documents found on the web are missing some pages or the image quality is so poor, they are difficult to read. We look over each document carefully and replace poor quality images by going back to the original source document. We proof each document to make sure it's all there - including all changes. If you find a good copy, you could print it using a network printer you share with 100 other people (typically its either out of paper or toner). If it's just a 10-page document, no problem, but if it's 250-pages, you will need to punch 3 holes in all those pages and put it in a 3-ring binder. Takes at least an hour. It's much more cost-effective to just order the latest version from Amazon.com This book includes original commentary which is copyright material. Note that government documents are in the public domain. We print these large documents as a service so you don't have to. *Ice Age Extinction* Jul 14 2021 Global warming seen from the other side: by the end of the last ice age, the earth had lost most of its large animal species and most of its humans. In a novel approach the author argues that the main cause of this catastrophic extinction was a drastic reduction in atmospheric carbon dioxide, due to the long period of cold, and he backs up his theory with scientific explanations given in clear language for the general reader. The author explores the causes of Earth's cyclical temperature changes and shows how those temperature shifts touch off a chain of events in the atmosphere, in the oceans and on land. Cold temperature was the trigger; and the resultant reduction in carbon dioxide, he argues, was the bullet that killed off so many species. The re-warming released more carbon dioxide into the atmosphere and fueled a resurgence which we are still enjoying. In addition, the author describes the human responses to increases in atmospheric carbon dioxide after the last ice age and in the last 150 years. Near the end of the last ice age, atmospheric carbon dioxide was about half of what it is today. Due to the lack of carbon dioxide, most of the vegetation disappeared from the middle and high latitudes. Without plants to eat, many large animals became extinct; North America lost three-fourths of its large animals including the woolly mammoth, mastodon, and saber tooth cat. Humans, too, had little to eat in these areas and their population declined dramatically. The book then explains how and why atmospheric carbon dioxide increased by about 50% after the last ice age ended, encouraging a population explosion among plants, animals and humans, all of which then migrated into many previously barren areas. More recently, the 28% increase in atmospheric carbon dioxide in the last 150 years has caused a six-fold increase in the human population. Changes in the next 300 years will reverse some of the current trends. There have

been some books on the causes of extinction over the last forty years, but all looked at other causes and none examined the role of low atmospheric carbon dioxide. This book has value for anyone interested in the ice age extinction; glaciers; the glacial cycle; the atmosphere and oceans; the past and future of plants, animals, and humans. It provides long-term information on atmospheric carbon dioxide, global warming and cooling.

Identity, Interests and Attitudes to European Integration Dec 27 2019 With growing levels of Euroscepticism across EU member states, grasping the roots of opposition to European integration has become more important than ever. This book charts public perceptions of the European Union in both the EU-15 and the new member states and introduces an identity-based model to explain mass Euroscepticism.

**Ice Composition and Glacier Dynamics** Jul 02 2020 Ice composition has until now been mostly used for reconstructing the environment of the past. A great research effort is made today to model the climate system in which the ice cover at the earth surface plays a prominent role. To obtain a correct model of the ice sheets, due attention must be paid to the physical processes operating at the interfaces, i. e. the boundary conditions. The idea behind the title of this book is that the study of ice composition can shed some light on the various processes operating at the ice bedrock and ice-ocean interfaces and more

generally on glacier dynamics. The book is not intended as a treatise on some specialized topic of glaciology. It is mainly the product of the experience of the two authors gained over several years research on the subject. The two authors are both members of the same university department and personal friends. The book was prepared in the following way. After a first draft of the complete book had been written by the first author, it was put in the hands of the second. The final version sent to the publishers is therefore the result of extended discussion, while at the same time preserving the unity of style that would have been lost had the two authors written selected chapters of the book individually. The book is organized into two distinct parts.

### **Ideologies of Marginality in Brazilian Hip Hop** Nov 06 2020

Based on more than five years of anthropological fieldwork in Sao Paulo, Brazil, this book highlights race, class, gender and territory to argue that Brazilian hip hoppers are subjects rather than objects of history and everyday life. This is the first ethnography in English to analyze Brazilian hip hop.

**Ice** Nov 25 2019 Like the adventurer who circled an iceberg to see it on all sides, Mariana Gosnell, former Newsweek reporter and author of *Zero Three Bravo*, a book about flying a small plane around the United States, explores ice in all its complexity, grandeur, and significance. More brittle than glass, at times stronger than steel, at other times flowing like molasses, ice covers 10 percent of the earth's land and 7 percent of its oceans. In nature it is found in myriad forms, from the delicate needle ice that crunches underfoot in a winter meadow to the massive, centuries-old ice that forms the world's glaciers. Scientists theorize that icy comets delivered to Earth the molecules needed to get life started, and ice ages have shaped much of the land as we know it. Here is the whole world of ice, from the freezing of Pleasant Lake in New Hampshire to the

breakup of a Vermont river at the onset of spring, from the frozen Antarctic landscape that emperor penguins inhabit to the cold, watery route bowhead whales take between Arctic ice floes. Mariana Gosnell writes about frostbite and about the recently discovered 5,000-year-old body of a man preserved in an Alpine glacier. She discusses the work of scientists who extract cylinders of Greenland ice to study the history of the earth's climate and try to predict its future. She examines ice in plants, icebergs, icicles, and hail; sea ice and permafrost; ice on Mars and in the rings of Saturn; and several new forms of ice developed in labs. She writes of the many uses humans make of ice, including ice-skating, ice fishing, iceboating, and ice climbing; building ice roads and seeding clouds; making ice castles, ice cubes, and iced desserts. Ice is a sparkling illumination of the natural phenomenon whose ebbs and flows over time have helped form the world we live in. It is a pleasure to read, and important to read—for its natural science and revelations about ice's influence on our everyday lives, and for what it has to tell us about our environment today and in the future.

Sustainable Sugarcane Production Apr 23 2022 The sugarcane crop, one of the most important crops commercially grown in about 115 countries of the world, faces a number of problems, such as low cane productivity, biotic and abiotic stresses, high cost of cultivation, postharvest losses, and low sugar recovery. This volume addresses these issues and provides a comprehensive account of the major advancements in sugarcane research. The book is compilation of recent achievements in sugarcane development and cultivation. It covers a number of improvements made in cane and sugar yield using both conventional and new biotechnological approaches by agricultural scientists and researchers. The comprehensive

coverage includes sustainable sugarcane cultivation, development, and management of sugarcane production, covering farming and biotechnology, entomology, pathology, breeding, physiology, biotechnology, agronomy, seed production, and more. It also presents research on modern crop production methods in a comprehensive and easily understood manner. With chapters from expert researchers from internationally renowned institutes (primarily in India), the volume presents the latest information from the literature at the international level to make it usable to many agroecological regions of the world. It will be a valuable resource for agronomists, breeders, plant physiologists, farmers, and students of agricultural sciences.

*ICT Developments in Nigerian Libraries* Jan 08 2021

Annotation Nigeria seems to be behind in a lot of areas North American, European, Australasian and even S.E. Asian librarians will say been there, done that long ago but that does not negate the fact that articles about the experience of placing computers in libraries, automation of processes, use of CD-ROMs, introduction of the Internet and so on are just as valid from people doing it now, today for the first time, as they were from when many of us did it 20 or 30 years ago.

**Idolon** Feb 09 2021 In a world where image is everything, where the past is more real than the present, the rich can reprogram everything—and cast themselves in the starring roles. Everyone else is nothing but an extra. . . . As part of the supporting cast, Pelayo survives as a test subject for the latest electronic skin and philm technology, which brings past trends and famous people to vivid life on his body. His cousin Marta works at a cinematique offering cheap skincense, image grafts, and nanimatronics. That's where she meets Nadice, an indentured worker smuggling illegal ware to escape an exclusive resort specializing in kitschy environs. But Nadice is hiding something far more contraband: a forbidden pregnancy she can't explain but is determined to protect. When Marta tries to help, both women disappear. While Pelayo searches for his cousin, homicide detective Kasuo van Dijk investigates a mysterious death that may involve a new kind of e-skin—mass-mediated ware that will lead him to Marta, Nadice, her employer—and a diabolical plan to deliver humanity kicking and screaming into a frightening new age of information. . . .

*Ice Shear* Jul 22 2019 A small town cop's murder investigation turns deadly when she uncovers a web of politics and drugs linked to an outlaw motorcycle gang in this gripping debut suspense novel for fans of *Winter's Bone*, *Frozen River*, *Breaking Bad*, and *Sons of Anarchy*. As a cop on the night shift in Hopewell Falls, New York, June Lyons drives drunks home and picks up the donuts. A former FBI agent, she ditched the Bureau when her husband died, and now she and her young daughter are back in upstate New York, living with her father, the town's retired chief of police. When June discovers a young

woman's body impaled on an ice shear in the frozen Mohawk River, news of the murder spreads fast; the dead girl was the daughter of a powerful local Congresswoman, and her troubled youth kept the gossips busy. Though June was born and raised in Hopewell Falls, the local police see her as an interloper—resentment that explodes in anger when the FBI arrive and deputize her to work on the murder investigation. But June may not find allies among the Feds. The agent heading the case is someone from her past—someone she isn't sure she can trust. As June digs deeper, an already fraught case turns red-hot when it leads to a notorious biker gang and a meth lab hidden in plain sight—and an unmistakable sign that the river murder won't be the last.

The Kremlin's Candidate Sep 28 2022 The “terrifically good” (The New York Times Book Review) finale in the New York Times bestselling Red Sparrow trilogy continues the dangerous entanglements of Russian counterintelligence chief Dominika Egorova and her lover, CIA agent Nate Nash, on the hunt for a Russian agent working in the US government. Russian president Vladimir Putin is planning the covert assassination of a high-ranking US official with the intention of replacing him with a mole whom Russian intelligence has cultivated for more than fifteen years. Catching wind of this plot, Dominika, Nate, and their CIA colleagues must unmask the traitor before he or she is able to reveal that Dominika has been spying for years on behalf of the CIA. Any leak, any misstep, will expose her as a CIA asset and result in a one-way trip to a Moscow execution cellar. Ultimately, the lines of danger converge on the spectacular billion-dollar presidential palace on the Black Sea during a power weekend with Putin's inner circle. Does Nate sacrifice himself to save Dominika? Does Dominika forfeit herself to protect Nate? Do they go down together? With a plot ripped

from tomorrow's headlines, *The Kremlin's Candidate* is "both timely and timeless; an espionage tale that takes the reader behind and beyond the headlines of Russia's assault on America" (Nelson DeMille).

**If God Is Good: Why Do We Hurt?** Aug 03 2020 The encouragement we crave—when we're most in need Out of the deepest hurts of the human condition, Randy Alcorn brings into clear focus our most pressing questions about evil and suffering—including those that wrench our souls when we or someone we love is victimized by evil or assaulted by disease. He faces these questions with seasoned sensitivity, skillful insight, and a heart of compassion. He dodges none of the difficulties, and never lapses into platitudes, hand-wringing, or oversimplification. On this troubling but inescapable topic, you'll find frank acknowledgment of the inherent limitations that set humanity apart from the God who has none. There's also generous, real encouragement that brings God nearer in our understanding when we need His comfort the most. And amid our heavy doubts and swirling confusion on this topic, Randy Alcorn points us ultimately toward Jesus as "the only answer bigger than the questions."

**Idyll Banter** Apr 30 2020 Years ago, Chris Bohjalian and his wife traded their Brooklyn co-op for a century-old Victorian house in Lincoln, Vermont (population 975). Bohjalian, a

bestselling novelist, began chronicling life in that gloriously quirky little village with a wide variety of magazine essays and his newspaper column, “Idyll Banter.” These pieces, written over the course of twelve years, are honest, funny, and deeply affecting reflections on the unique idiosyncrasies of small-town life (annual outhouse races) and the universal experiences (our hunger for neighborliness) that unite us all.

**Ice Song** Sep 16 2021 “Reminiscent of Ursula Le Guin’s paradigm-shattering *The Left Hand of Darkness*, this piercingly moving story belongs in most fantasy collections.”—Library Journal There are secrets beneath her skin. Sorykah Minuit is a scholar, an engineer, and the sole woman aboard an ice-drilling submarine in the frozen land of the Sigue. What no one knows is that she is also a Trader: one who can switch genders suddenly, a rare corporeal deviance universally met with fascination and superstition and all too often punished by harassment or death. Sorykah’s infant twins, Leander and Ayeda, have inherited their mother’s Trader genes. When a wealthy, reclusive madman known as the Collector abducts the babies to use in his dreadful experiments, Sorykah and her male alter-ego, Soryk, must cross icy wastes and a primeval forest to get them back. Complicating the dangerous journey is the fact that Sorykah and Soryk do not share memories: Each disorienting transformation is like awakening with a jolt from a deep and dreamless sleep. The world through which the alternating lives of Sorykah and Soryk travel is both familiar and surreal. Environmental degradation and genetic mutation run amok; humans have been distorted into animals and animal bodies cloak a wild humanity. But it is also a world of unexpected beauty and wonder, where kindness and love endure amid the ruins. Alluring, intense, and gorgeously rendered, *Ice Song* is a remarkable debut by a fiercely original new writer. Praise for *Ice Song* “A stunning debut fantasy about

love and the ties of blood.”—Armchair Interviews “Kasai’s debut is a boldly adventurous tale depicting a richly detailed world. The aspect of Traders shifting gender brings Ursula K. LeGuin’s *The Left Hand of Darkness* to mind, while the activities on Chen’s island are more reminiscent of Laurell K. Hamilton’s Meredith Gentry novels.”—Booklist “Ice Song is definitely a compelling read, largely due to the fact that Sorykah is such a well-developed character. She has an equally intense and complex sense of love and resentment for her children. And the fact that she exists between the world of humans and the mutants is also a source of conflict for her character . . . Ice Song is a near-perfect combination of fantasy, great storytelling and social commentary.”—Philadelphia Gay News
